PROFESSIONAL SUMMARY

Results-driven React Native Developer with 2+ years of experience architecting and delivering production-grade cross-platform mobile applications across e-commerce, social media, healthcare, and lifestyle domains. Proficient in the full mobile development lifecycle — from system design, state management, and API integration to performance optimization and deployment on Play Store and App Store. Skilled at building scalable, maintainable codebases with reusable component architecture and integrating complex third-party services including payment gateways, live streaming, and real-time data systems.

TECHNICAL SKILLS

Mobile: React Native • JavaScript (ES6+) • TypeScript • Expo • Android • iOS • App Optimization • Memory Management

State Management: Redux Toolkit • Context API

APIs & Integrations: RESTful APIs • Stripe • Firebase • Socket.IO • Push Notifications • Live Streaming APIs

Tools & Libraries: Git • React Navigation • Axios • AsyncStorage • Deep Linking • AWS • Debugging

Deployment: Play Store • App Store

WORK EXPERIENCE

React Native Developer — Syncglob Pvt. Ltd.

May 2023 – Present

- Architected and shipped 4+ cross-platform mobile applications from scratch across e-commerce, social media, healthcare, and lifestyle verticals.
- Designed modular, scalable codebases with reusable component libraries, reducing development time and ensuring UI consistency across projects.
- Integrated Stripe, Firebase, live streaming APIs, and push notifications into production apps with robust error handling and performance tuning.
- Led end-to-end delivery — from architecture and feature development through QA, Play Store & App Store deployment, and post-launch maintenance.
- Collaborated with UI/UX designers and backend engineers to deliver pixel-perfect, performant experiences on tight deadlines.

KEY PROJECTS

Petvesta • E-Commerce Mobile App | React Native • Stripe • Redux Toolkit

- Engineered a full-scale React Native e-commerce application with product listing, search, cart management, favourites, and voucher systems.
- Implemented dual-payment checkout integrating Stripe for card transactions and Cash on Delivery (COD), with real-time order tracking and order history management.
- Built offline-first architecture using AsyncStorage, deep linking for product sharing, and optimized API calls for fast load times across Android and iOS.

Ultimatum • Social Media Game App | React Native • Live Streaming APIs • Redux Toolkit

- Architected a real-time social game platform featuring live streaming, public polls, social feed with posts, and a challenge system for users and specific locations.
- Built scalable event-driven state management with Redux Toolkit to handle live interactions, concurrent users, and dynamic challenge workflows without performance degradation.
- Applied memory optimization and lazy loading for media-heavy screens, ensuring stable performance during live streaming and high-traffic social interactions.

Chef876 • Recipe Discovery App | React Native • REST APIs

- Designed a personalized cuisine discovery experience with preference-based filters, reusable card components, and fast async API calls across multiple cuisine categories.
- Engineered efficient data fetching with caching strategies to minimize API calls, reduce load times, and deliver a seamless browsing experience across a large recipe catalogue.

Education: B.Com (Bachelor of Commerce), 2022 | **Languages:** English (Professional) • Hindi • Punjabi

Strengths: End-to-End Ownership • Agile Collaboration • Fast Learner • Deadline-Driven
